

# LP CONSULTING AUSTRALIA - THE COMPANY

LP Consulting is a Civil and Water Engineering and Building Hydraulics Services company. We provide expert design and construction services in the fields of expertise which we market to industry. LP Consulting provides a made to measure service for Building Hydraulics Services and only uses highly skilled and experienced practitioners who have a long history of design of Hydraulic Services.

Highlights of the Company include:-

- Senior Personnel with over 30 years of experience across all disciplines
- Super new offices in the heart of the Sydney CBD and conveniently located to all transport hubs
- An excellent work office environment and new office equipment
- Opportunity to learn and grow with the business
- A high level of project involvement
- Excellent technical support
- Flexible work hours

## HYDRAULIC SERVICES DESIGNER – THE ROLE

LP Consulting is experiencing growth across its business disciplines and is striving to expand its Hydraulic Services capability. The Hydraulic Services Designer will be self motivated, will have a passion for Hydraulic and Fire Services and will recognise that with success comes reward.

We meet with stakeholders and Clients at early stage of a project and provide early Space Planning advice and Concept Design. Our designs will be innovative, cost effective and detailed. We provide Detailed Design and Documentation for a range of service streams including:-

- Potable Cold Water
- Recycled Stormwater
- Sewer, Grease and Trade Waste Drainage
- Backwater and Greywater Treatment and Reuse Systems
- Stormwater Drainage including Onsite Detention
- Sub-soil Drainage
- Sanitary, Grease and Trade Waste Plumbing
- Hot and Cold Water Generation and Piping Systems
- Natural and LP Gas Systems
- Fire Hose Reels
- Fire Hydrants

We are seeking expressions of interest from experienced Hydraulic and Fire Services Designers who wish to take on a role that involves providing expert advice in all facets of the services. The Candidate will be required to consult across all phases of project delivery from Inception, Design and to Completion.

The Hydraulic Services Designer will be expected to conceptualise systems, discuss and agree these designs with the Principal Engineer, liaise with Clients, produce detailed and concise designs and oversee the drafting of these designs. Additional tasks will include writing

correspondence to Authorities and drafting Technical Specifications. You will liaise with Authorities and other disciplines and attend meetings with stakeholders as required.

## **QUALIFICATIONS, PROJECT EXPERIENCE and SKILLS**

The successful candidate will have the following qualifications, project experience and interpersonal skills:-

- A minimum of 5 years site experience as a qualified Plumber and preferably some experience as a Plumbing Supervisor
- Associate and or Diploma in Plumbing Services achieved through TAFE NSW
- A minimum 3 to 5 years experience in a locally based Design office in Sydney or NSW
- Sound knowledge in the interpretation of the Building Code of Australia, relevant Australian and NZ Standards and local Codes and Guidelines
- Sound knowledge of Microsoft programmes including Word, Excel and Office Project
- Quality oral and written communication
- Be self motivated, work independently and collaboratively with other staff and colleagues as part of a team of consultants
- A Passion for Hydraulic and Fire Services
